

THREAT RISK MANAGEMENT

HSE027

COURSE DESCRIPTION

Risk and safety management play an important part in every business success. Identifying the various types of risks and the implications that each might have on an organisation, as well as highlighting the business benefits that can be obtained through successful risk and safety management all need to be included in an overall company strategy.

This course is designed to provide guidance for the identification of risks and related threats associated with the working environment and the principles to be applied in relation to carrying out suitable risk assessments so as to ensure staff safety and business continuity.

COURSE GOAL

To enhance the participants' knowledge, skills, and ability necessary to carry out risk assessments in their workplace.

COURSE OBJECTIVES

By the end of this course, participants will be able to:

- Identify and apply the techniques of risk identification.
- Understand risk assessment process.
- Determine the key elements of risk analysis.
