

FACILITATE RISK ASSESSMENT, PRO-POSE RECOS LIAISE & FOLLOW UP

HSE028

COURSE DESCRIPTION

Health and safety issues are becoming increasingly important in the modern industrial world. Risk assessment is a core element of health and safety management. Risk and safety management play an important part in every business success. Identifying the various types of hazards/risks and the implications that each might have on an organization, as well as highlighting the business benefits that can be obtained through successful risk and safety management all need to be included in an overall company strategy.

The emphasis on management of health and safety and management of risk is becoming more prevalent in legislation. This course will provide participants with the practical knowledge to enable them to carry out risk assessments in their workplace. It is designed to provide guidance for the identification of hazards associated with the working environment and the principles to be applied in relation to carrying out suitable risk assessments so as to ensure staff safety and business continuity.

COURSE GOAL

To enhance participants' knowledge, skills, and abilities necessary to perform risk assessments and identify hazards associated with the working environment and the rules to be applied in relation to carrying out suitable risk assessments

COURSE OBJECTIVES

By the completion of this course, the participant will be able to:

- Be familiar with MOM risk assessment guidelines.
- Understand risk assessment process.
- Apply techniques for hazard identification.
- Understand the key elements of risk analysis.

WHO CAN BENEFIT
